The phrase sustainable agriculture was reportedly coined by the Australian agricultural scientist Gordon McClymont. During its brief history, agriculture has radically transformed human societies and fueled a global population that has grown from 4 million to 7 billion since Meetings. 2019 Annual Meeting Washington, D.C.. June 6-8, 2019. Power in Agricultural History. The Agricultural History Society Annual Meeting Postcard. The history of agriculture records the domestication of plants and animals and the development and dissemination of techniques for raising them productively. Pigs were domesticated in Mesopotamia around 11,000 BC, followed by sheep between 11,000 and 9,000 BC. History[edit]. Main article: History of agriculture. The history of agriculture is the story of humankind's development and cultivation of processes for producing food, feed, fiber, fuel, and other. For the most part, these changes have been good ones. But as we enter a new era of human history, agriculture faces new challenges and new responsibilities. The history of agriculture begins in the Fertile Crescent. This area of Western Asia comprises the regions of Mesopotamia and the Levant, and is confined by the History of Agriculture. Agriculture is defined as the cultivation and exploitation of animals, plants (including fungi) and other forms of organic life for human use including food, fiber, medicines, fuel and anything else. The practice of industrial animal agriculture is a relatively recent development in the history of agriculture, and the result of scientific
