

The Peak District: Landscapes Through Time (Landscapes of Britain)

The Peak District - Britain's first National Park - has some of Britain's richest archaeological landscapes. When this book was first published in 1997, in Batsford's English Heritage series, it revealed them for the first time in all their diversity. Prehistoric barrows, stone circles, Romano-British settlements, medieval fields, ancient drove-ways, nineteenth-century lead mines: all are prominent in this extraordinary area. This new edition draws on the extensive archaeological research that has taken place in the Peak since 1997, and provides new maps and interpretations. It tells the story of a famous landscape's evolution.

Landscape and Prehistory on Gardoms Edge, Derbyshire John Barnatt, Bill Bevan, Mark Edmonds. Bibliography Memoir of the British Geological Survey, England and Wales Sheet 111.
